RecordX

...smarter ways to do business

Happier customers, higher sales, better business security: RecordX helps you drive the changes that matter most.

Comprehensive call recording

RecordX provides the call information you need to make a real difference to your business. Every phone conversation is recorded and securely stored for quick and easy retrieval. You can use recordings to evaluate and improve service and sales techniques, to check customer contracts and requirements, or as evidence in case of disputes over the phone. In short, you can tick all the boxes.

RecordX is also fully compliant with FCA guidance and PCI DSS and HIPAA regulations governing transactions over the phone.

Take the guesswork out of communications management

1. Record calls from analogue trunks, SIP, ISDN2, ISDN30, VoIP and from extensions.
2. Monitor and improve call handling using playback and call evaluation.*
3. Protect your business integrity and client relationships with tamperproof evidence of who said what in case of disputes.
4. Exhibit a professional commitment to customers whilst deterring fraudsters, by informing callers that all calls are recorded when they dial in.
5. Demonstrate compliance with all current FCA and PCI financial regulations.
6. Playback calls to confirm customer requirements such as order quantities and values.
7. Match call recordings to extensions, so you can know where the calls are going and who handles them.**
8. Integrate RecordX easily alongside your current phone system, and add on components such as call reporting or CRM integration.

Mark, store, search and retrieve calls using a selection of filters.

The screenshot displays the RecordX software interface. At the top, there are navigation tabs: RECORDINGS, EVALUATIONS, SYSTEM, and HELP. Below these, a 'Saved Filters' section shows 'Default' selected. A search bar includes fields for Date (01/01/2017), Start Date (01/01/2017), Direction (All), Extension (All), Time, Finish Date (02/02/2017), Duration (All to All), and Phone Number. Below the search bar are buttons for 'Search Recordings' and 'Export', with a link to 'Show Advanced Options'. The main area is a table with columns: Date & Time, From, To, Participants, Duration, Tags, and Completion. The table lists various call recordings with details like dates, times, phone numbers, participant names, durations, and tags such as 'Mobile Phone Sale' and 'Vodafone'. At the bottom, there is a waveform player with a timeline and a list of call recordings with their respective durations and times.

Simple, powerful playlist management.

Get a grip on
performance.

RecordX Call Evaluation* helps you assess performance to make sure your team are giving their best.

Monitor progress

Individual and team targets can be supported by using pre-populated questionnaires to evaluate performance on a specific task or as an ongoing measure of progress.

Identify training needs

Assessments can help flag up any training needs to improve technique or in response to identified trends in customer interactions.

Support your team

Playlists of exemplary call recordings can be collated and used to provide training in different areas.

Software you
can trust.

Oak have been designing and developing call recording and reporting products since 1987, combining innovation with intuitive design for clever solutions that anyone can use.

RecordX is part of Oak's best-selling 'X' Series of 'ready-to-go' products, already used by tens of thousands of businesses across the UK. It integrates seamlessly with any phone system, as well as any of Oak's call reporting and integration tools.

Oak can also provide a Software Development Kit (SDK) to enable your engineers to integrate RecordX with your other systems. This can add functionality, such as PCI compliant start/stop commands from third party software, or enable recordings to be accessed through CRMs, websites etc.

RecordX comes with your choice of service package, so you can be sure we'll be there when you need us most: online, on site and on the phone. We'll make sure that your system works perfectly for you, and that you benefit from any future updates.

Call recording for every business

Your solution; your choice
